

Income Tax Preparation Kiosk

Abstract

The Income Tax Preparation Kiosk will allow for a more intimate setting with clients of heavier workloads for any income tax preparer/accountant. Much of the RAL clients' income tax preparation is automated and depends on the efficiency of the preparer. This kiosk will minimize the time spent on returns that are due 100% and more earned income credit. This will provide more quality time for the more involved client. Leaving the more simple, income tax preparation, tasks to the kiosk will allow for less waiting and more precise preparation of more involved clients. Reducing the number of audits and easing the pinch on taxpayers.
